PALY

General

The majority of students in Palo Alto are making healthy decisions and express healthy attitudes when it comes to alcohol, drug use and related high risk behaviors.

The majority of students are overestimating the degree to which their school peers are involved in these behaviors.

There are a number of students who report regular substance use and high risk behaviors and attitudes (like DUI, binge drinking, etc.).

The majority of students share school and community values regarding alcohol at dances, driving/riding under the influence, binge drinking, etc – yet express concern about the fairness and enforcement of particular policies on campus and in the community.

A large majority of students want youth voices to be included in future policies and decision-making.

Palo Alto student’s perceptions of bullying are not the same as the reality.
